

# FATHER JOE'S VILLAGES

## VILLAGE HEALTH CENTER

### Primary Care

- Our family medicine providers (MDs, NPs, and PAs) are able to see scheduled appointments and same day walk-in clients
- Appointment topics include wounds, chronic disease management, assistance with disability benefits, and much more
- Medication Assisted Treatment (MAT) services are also offered daily for clients seeking assistance with substance use

### Psychiatry

- All of our current psychiatrists are dual family medicine/psychiatry providers
- We offer scheduled appointments and same day walk-in availability for clients every day who are seeking care for mental health

### Dental

- Clients seeking dental services are able to be seen for scheduled appointments and same day walk-ins
- Dental services include dental emergencies, cleanings, extractions, fillings, crowns, dentures, and select procedures

### Transformative Recovery Services

- TRS provides scheduled and same day walk-in counseling services for those with substance use disorders, offering both individual and group counseling
- TRS takes a harm reduction approach to care, meeting clients where they are at, regardless of their stage of change

### Behavioral Health

- BH offers both individual and group therapy for those with varying levels of mental health needs
- Appointments are available each day as scheduled or same day walk-ins

### Street Health

- The SH team provides outreach health services by bringing medical care directly to people living on the streets
- The goal of this team is to reach clients who are unable to get health care services in the clinic
- The SH team operates daily and collaborates with the Medical, Psych, TRS, and BH teams to bring health services to clients

### Triage Nurse

- The triage nurses are available every day to assess walk-in clients and direct them to the appropriate services
- Nurses are also able to work within standing protocols and assist clients with certain needs independently
- Common nursing visits include vaccines, wound care, blood pressure readings, medication assistance, and general health questions
- Walk-in clients will be put on a waiting list and filtered onto the schedule to see a provider when appointment slots become available
- Walk-in clients are often able to be seen same day. Although same day access is not a guarantee, our nurses are typically able to connect 80% of clients walking in for an appointment. The best walk-in times are 8:30 AM & 12:30 PM

### Clinic Hours

**Monday-Friday**

**8:30 AM - 5:00 PM**

**Closed from 12:00 PM-12:30 PM**

**Doors close at 11:45 AM and 4:45 PM**
